Moving heads, stage lighting, lighting effects and control equipment

**Event Production Services**  
Design and planning services to help you deliver the ultimate technical solution for your event

## Initial Consultation

We carry out an initial consultation and a site visit. We discuss your brief and requirements in detail, ensuring we understand the full scope of your event and that no detail is overlooked.

## Event Proposal

Our production team produce a proposal giving you our professional recommendations and a range of options for you to consider. We are always on hand to help you find the right solution to match your budget.

## Production Delivery

With 14 years of experience in the events industry, our technicians are skilled in handling even the most complex AV setups. You can trust us to flawlessly execute every technical detail, leaving you free to focus on the event's success.

## Post-Production

Our range of post-production services includes picture and sound editing, recording voice-over, sound mixing, recording or sourcing music, animated graphics, colour grading and subtitling.

# Testimonials

## Sian - Animal Welfare Foundation

You are a joy to work with. Virtual and hybrid events were a completely new area for us, and when we felt nervous or unsure you were able to reassure us and explain the processes perfectly. The team are kind, conscientious, and absolutely know their stuff! Our most recent events have been praised as 'slick', 'incredibly professional', and 'a joy to be part of', which for the most part is down to the HF team!

## Jon Cosbieross - Jaguar Land Rover

Hire Frequencies dealt with our event enquiry promptly and professionally - faultless. Very pleased and reassured by the advice. We were very satisfied with the technical solution - first class, especially given security challenges presented by our systems.

## Kelly Rosser - NFWI Wales

We were extremely happy with how everything came together and the end result of our event. Great feedback from all Board, Staff and members. The tech/sound team were great to work with on the day of event. Nothing was too much trouble. All the HF team were friendly and approachable from the start to end of event. They remained very calm even with a global internet cut out! The HF team then provided a backup immediately which made little impact on the event.

## Henry Westray - Midnight Club (Adidas)

We had a 2 week long pop up installation in central London with a quick turnaround needed. The Hire Frequencies team were nothing but excellent in their advice, swift set up and technical support throughout the installation!

# Some of our regular clients & venues

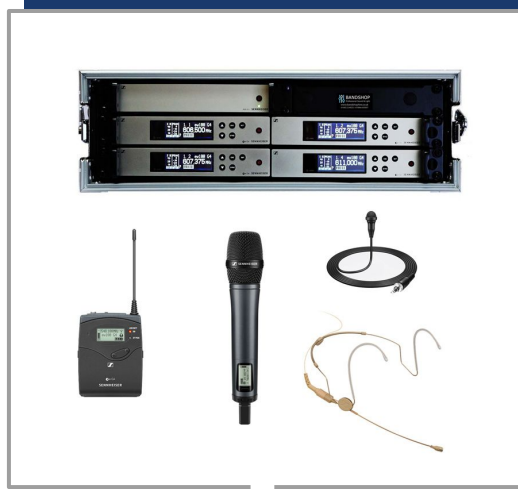

# Key Technology - Audio

## PA Systems

Our sound systems feature scalable resolution for adaptable coverage, consistency and control for efficient deployment at live events

## Wireless Audio

A large range of wireless microphone and wireless audio transmission solutions for productions and events

## Audio Control

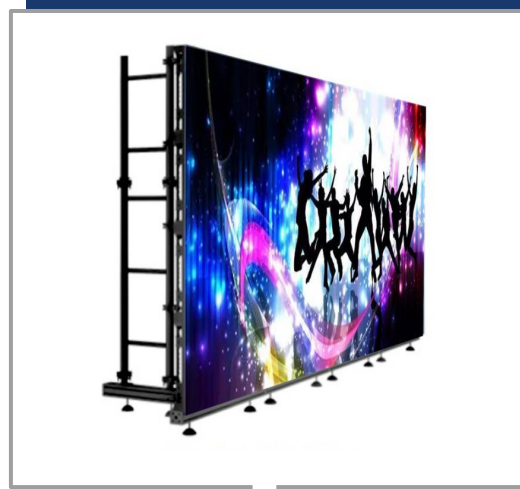

The latest audio mixing console packages giving high quality and reliable results

# Key Technology - Video & Broadcast
