

# Welcome to the reimagined Wolfson Theatre

## Nature. Sustainability. Accessibility.

RCP London Events is thrilled to introduce you to the newly refurbished Wolfson Theatre, our built-in tiered auditorium hosting up to 304 delegates and cutting-edge technology facilities.

Designed to elevate your event or conference to the next level, the renovations reflect our continued commitment to innovation and excellence. This ensures that the Wolfson Theatre remains a premier choice for event organisers seeking a functional space blending state-of-the-art technology with thoughtful design.

### Sustainability at its core

At the heart of the Wolfson Theatre refurbishment is our dedication to sustainability. The new design includes eco-friendly materials provided by environmentally conscious suppliers. From carpets created using recovered fishing nets to acoustic handmade wood panelling and new ergonomic seats made in the UK, your event attendees will benefit from a modern, refreshed design that is also kind to the planet.

### Reconnecting with nature

Nature is all around the Wolfson Theatre, with the Medicinal Garden surrounding this space. Bringing natural elements into the theatre was a key goal of the refurbishment, which included introducing elements to reconnect the space to nature and creating a calm, inspiring atmosphere.

### Accessible experiences for all

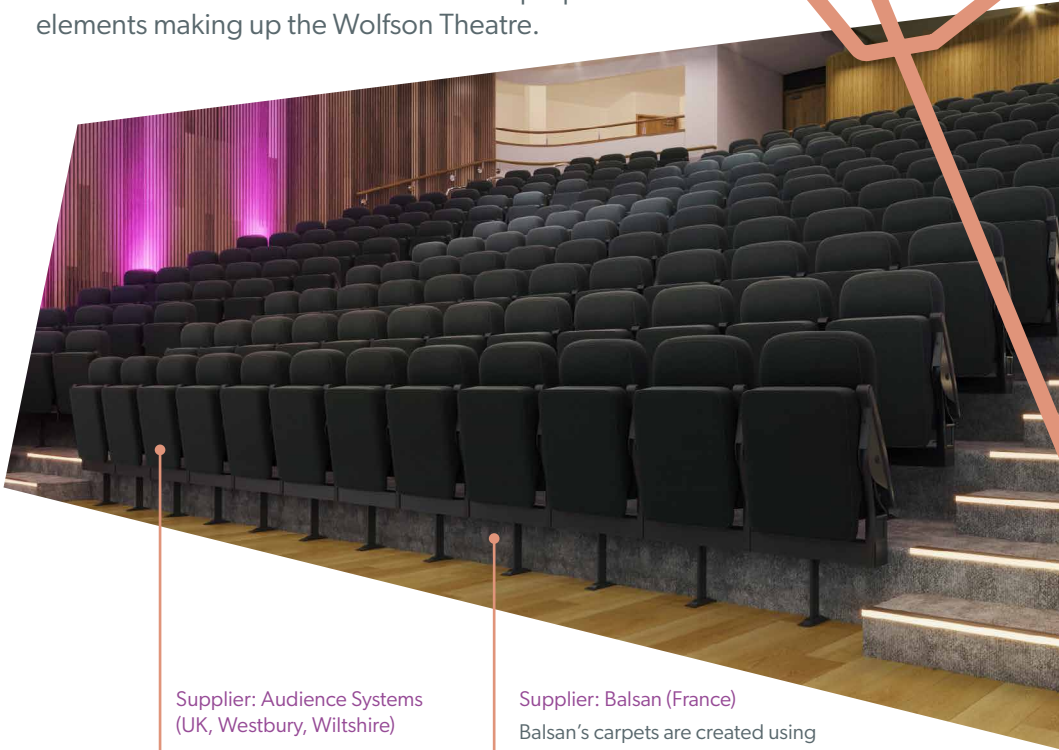

We are proud to highlight that the Wolfson Theatre has been redesigned with neurodiversity in mind. The new design uses a palette of muted and neutral colours, including various shades of grey and green, as well as textured surfaces and natural materials to add depth without overwhelming the senses.

## Partners in sustainability: our eco-conscious suppliers

Find out more about our new seats, carpet and wood panelling suppliers – selected with sustainability in mind. They all provide premium products created to be durable and offer maximum comfort.

Delve into their stories and discover the properties of the new elements making up the Wolfson Theatre.

### Supplier: Audience Systems (UK, Westbury, Wiltshire)

Leaders in the sector, our chair supplier is committed to reducing their carbon footprint and using quality material that lasts.

Classic, compact and elegant chairs that guarantee all day comfort. The Espace 628 High Back Chair has been tested and certified to the highest level of strength standard; 100% manufactured in the UK (Wiltshire).

### Supplier: Balsan (France)

Balsan's carpets are created using recovered fishing nets, transformed into econyl yarn. The result is an eco-friendly product with a reduced environmental impact. ISO 9001 and ISO 14001 certified supplier.

Inspired by the Berry countryside in France, our new carpet is part of the 'Take a Walk' collection, evoking welcoming and calming natural settings and bringing nature to the corporate world. The selected shade resembles the grey of rocks while being in line with the main colours of our modernist building. These tiles are ecofriendly, featuring 100% recycled and recyclable Econyl piece-dyed yarn.

## An inclusive design

We are very proud to have selected elements throughout with neurodiversity in mind. In fact, bright colours and busy patterns can be visually overwhelming for people who are neurodivergent. We have specifically chosen a monochromatic, muted and neutral colour scheme to promote a sense of tranquillity and stability.

The subtle repeating patterns in the carpet design and wood panelling are thought to be soothing, while also allowing the audience to reconnect with nature. Combined with our hearing loop app and accessibility features, we hope the new Wolfson Theatre design will provide a comfortable and welcoming environment for everybody to learn.

Supplier: Naturewall  
(UK, East Yorkshire)

Inspired by nature, our wall panelling supplier values quality, simplicity, sustainability and authenticity.

Members of Made in Britain, an organisation bringing together businesses that champion UK manufacturing.

Hand-made panelling created using high-quality materials, including recycled felt. It features acoustic properties to guarantee high-quality sound in the room.
